L. Geer 10, Eindhoven

Dear Niek van Gogh,

As a lifelong gamer originally from California and now a final-year student in ICT Media Design at Fontys University, I'm excited to apply for the internship opportunity at Shockbyte. With thousands of hours spent playing games like Minecraft and ARK, I've also had hands-on experience setting up and managing servers for friends. This makes the challenge of simplifying game server hosting deeply personal and genuinely compelling for me.

My background in UI/UX design and front-end development (React, HTML, CSS, JavaScript) equips me to approach this internship with both a user-centric mindset and a technical edge. During my previous internship at Motivate.nl, I focused on improving digital systems and interfaces, which sparked a strong interest in enhancing usability through research and prototyping.

I resonate with your mission to make game server hosting accessible to everyone, not just the tech-savvy. I'm eager to contribute ideas that bridge the gap between gamers and technology, and I believe my empathy for your user base—because I've been one myself—puts me in a great position to do so.

Best Regards,

Connor McClanahan

Dear Teun Hendriks,

I'm excited to apply for the Graduation Internship focused on AnyID at Globe Protocol. As a final-year ICT Media Design student specializing in Smart Mobile development, I'm enthusiastic about your mission of empowering users with secure and transparent control over their personal data.

My experience includes UI/UX design, front-end development, and app development using React, HTML/CSS, JavaScript, and Swift. During my internship at Motivate.nl, I analyzed and improved digital systems, gaining valuable insights into practical system optimization.

I am particularly drawn to your innovative approach and commitment to privacy-by-default. Joining Globe Protocol would provide an excellent opportunity for me to further develop my skills while contributing to meaningful projects.

Thank you for considering my application—I look forward to your response.

Dear Rik Snelders and the Motivate Team,

I am writing to express my interest in the challenging UI/UX internship at Motivate, as advertised. Currently studying ICT Media Design with a special focus on Mobile Development, I am eager to bring my understanding of user-centric design and front-end technologies to a platform that drives industry performance.

My toolkit includes Figma, Adobe XD, and Axure for crafting intuitive designs, and I am familiar with Illustrator and Photoshop. I'm particularly excited to refine these skills and embrace the complexities of designing for the manufacturing industry's unique needs.

With extensive experience in HTML, CSS, and JavaScript, and a basic knowledge of Vue.js, I am prepared to translate designs into functional code. My analytical skills and creative mindset drive me to find innovative solutions to improve user interactions and onboarding experiences.

I look forward to the opportunity to contribute to Motivate's mission, work on substantial projects for renowned clients, and absorb knowledge from a multidisciplinary team. Plus, I'm always up for a good match of table football to wind down after a productive day.

Thank you for considering my application. I am keen to discuss how my background and skills align with Motivate's goals for revolutionizing user experiences in the manufacturing industry.

Dear Simptel Team,

I am writing to express my enthusiastic interest in exploring internship opportunities within innovative companies like Simptel in the realm of UI/UX design. With a foundational background in both front-end development and UI/UX design, I am eager to bring my skills to a team where I can contribute to impactful projects and continue my professional development.

My proficiency in various technologies such as Swift, HTML, Javascript, PHP, Kotlin, and CSS allows me to approach design and development with a holistic understanding of the digital product lifecycle. Specializing in mobile platforms, I prioritize creating intuitive, user-centered designs that enhance user engagement and satisfaction.

In past roles, I served as a UI/UX designer and front-end developer for my school, working on various projects that catered to different stakeholders in the real industry, such as Urban Sports Tracking and LiveWall. This role demanded a seamless blend of design thinking, user-centric design principles, and front-end development skills to ensure the delivery of robust digital solutions that effectively met user needs and stakeholder expectations. These experiences have honed my skills in creating visually compelling, functional, and user-friendly digital solutions.

What excites me about the opportunity at Simptel is your forward-thinking approach to powering the future of business communications through next-generation technology. Your emphasis on improving cloud communications and enhancing the customer journey resonates strongly with my passion for creating user-centered digital solutions. I am particularly drawn to your upcoming platform release, which aims to globally introduce new features and customer journeys, as it aligns with my interest and expertise in developing innovative, intuitive, and impactful user experiences. I see a wonderful synergy between my skills, past experiences, and the groundbreaking work being done at Simptel, and I am eager to contribute to your ongoing and future projects, particularly in enhancing and implementing UI/UX strategies for your new platform.

Best Regards,
Thank you for considering my application. I am looking forward to the possibility of discussing my application in further detail and exploring how I can contribute to the user experiences at Simptel.

E. connor.e.mcclanahan@gmail.com

L. Geer 10, Eindhoven

Dear Dual Inventive Team,

I am writing to express my strong interest in the internship position at Dual Inventive. As an American International Student studying ICT Media & Design at Fontys University of Applied Sciences, I am excited about the opportunity to contribute to the safety of the track access mobile app and the critical part it plays in MTinfo 3000.

I am confident that my skills and experience in mobile development make me a suitable candidate for this internship. During my last semester at school, I focused on mobile development and gained proficiency in Swift, Flutter, Kotlin, and JavaScript. These languages have equipped me with the ability to develop robust and user-friendly mobile applications.

Your research questions regarding the safest methods of communicating with users' smartphones align perfectly with my technical expertise and interests. I am eager to explore and provide insights into the following areas:

1. The safest method of sending messages to the user.
2. Ensuring message reception confirmation.
3. Enhancing emergency notifications, even when user volume is low or flight mode is enabled.
4. Monitoring drops in mobile and internet connectivity.
5. Implementing geofencing to warn users when leaving secured work zones.

I believe that my practical experience in mobile development, coupled with my passion for user-centered design and problem-solving skills, make me well-equipped for this internship. I am confident that I can contribute effectively to your ongoing projects and research objectives.

Moreover, I am enthusiastic about the opportunity to work with experienced professionals at Dual Inventive and further expand my knowledge and skills. The company's commitment to safety and technological advancement aligns perfectly with my own values and long-term career goals.

Thank you for considering my application. I am available to discuss my qualifications further at your convenience and provide any additional information or references you may require.

Best Regards,

Dear Dutch Coding Company Team,

I am Connor McClanahan, an American international student pursuing my studies in ICT at Fontys University. My lifelong interests in design, art, and usability have led me to the fascinating world of software development and UI/UX. I'm thrilled to apply for the Development Internship at Dutch Coding Company, ready to harness my passion and experiences in a dynamic and growth-oriented environment.

In my academic journey, I've actively involved myself in various school projects, collaborating with different companies. These experiences have afforded me invaluable practical skills and a comprehensive understanding of real-world settings. I've developed competencies in several programming languages, such as Swift, HTML, Javascript, PHP, Kotlin, and CSS, and look forward to expanding my expertise with your team.

Working independently on a research project, sharing insights with the team, and exploring new topics resonate deeply with me. The prospect of focusing on AR/MR, protocols for direct communication between hardware and mobile software (e.g. IoT), or multiplatform hybrid development is exhilarating.

As an international student, I bring a global perspective to my work, which I believe can add value to your diverse and dynamic team. I am highly intrigued by Dutch Coding Company's culture of continuous learning, professional growth, and the focus on both work and fun. I am equally enthusiastic about participating in team activities, hackathons, and trips! Thank you for considering my application. I am looking forward to the possibility of joining Dutch Coding Company's internship program, diving into new challenges, and growing alongside the team.

Tover Recruitment

P. +31684303223

E. connor.e.mcclanahan@gmail.com

L. Geer 10, Eindhoven

Dear Tover Recruitment,

I am writing to express my profound interest in the User-Centered Design Intern position at Tover. As an American international student studying ICT at Fontys University, I have been passionately honing my skills in both software development and UI/UX, particularly in user-centered design methodologies and tools such as Figma.

What truly draws me to this opportunity is Tover's commitment to creating meaningful experiences for individuals living with cognitive challenges and their caregivers. My interest in design has always been driven by the desire to make a positive impact on people's lives. Your innovative Tovertafel seems like a magic wand that brings joy and inclusion to a demographic that often gets overlooked, and I'd be honored to contribute to this noble purpose.

At Fontys, I have actively participated in various school projects and have had the opportunity to work on creating solutions for real-world settings. Through these projects, I've gained hands-on experience in user research, which I understand is a key part of this role. I've developed competencies in prototype creation and visualizing, helping me translate user needs and wishes into effective, stimulating design concepts.

Additionally, my background in working on collaborative projects will serve me well for the co-design approach at Tover. I am confident in my ability to work alongside the target group and their caregivers, obtaining valuable insights and incorporating them into the development process. This unique approach, putting the users first, aligns perfectly with my philosophy towards design.

I appreciate that Tover values team players who can also function independently, as I consider myself adaptable to both situations. I have developed strong communication skills, and while my Dutch language skills are a work in progress, I am fully committed to improving them, given the opportunity to do so.

Thank you for considering my application. I look forward to the possibility of contributing to the Tover team and bringing a million smiles a day to the people we serve.

Best Regards,

Connor McClanahan

Dear Hiring Manager,

As an ICT student at Fontys University, I am passionate about user experience and committed to fostering consumer-centric innovations. I am excited to apply for the Sensory & Consumer Research Internship at Danone's global User eXperience team, where I believe my knowledge and experience can bring a fresh perspective to your initiatives.

My academic journey, focused on both software development and UI/UX design, has been underscored by an inherent interest in the intersections of technology, design, and human behavior. This interest aligns perfectly with the User eXperience team's mission of delivering the best possible product experience to patients and healthcare professionals. I'm particularly fascinated by your work in specialized nutrition, and I see a tremendous opportunity to apply my skills in this area.

Throughout my studies, I have actively used sensory and consumer science methodologies in various projects, with a focus on gathering and analyzing data to yield actionable insights. I have honed my skills in organizing and leading teams, which I believe will enable me to co-lead UX research programs and support innovation effectively. Moreover, my proficiency in tools such as Figma will be beneficial in translating insights into prototype development.

At Fontys, I've learned the importance of embracing a user-centric mindset and have seen first-hand how this approach can enhance product usability and satisfaction. I am confident that I can bring this perspective to the Danone team, supporting flavour development, prototype screening, and driving user-centricity across various projects.

I appreciate Danone's commitment to a healthier world and inclusive work culture, both of which resonate deeply with my personal values. I look forward to the possibility of contributing to your team, and I am excited about the opportunity to learn, share my insights, and make a difference at Danone.

Thank you for considering my application. I hope to have the chance to discuss how my skills and interests align with Danone's mission.

Best Regards,

Connor McClanahan
