

Meeting notes

client meeting notes (9-9-2024):

- Core idea 3 & 4, his main interests
- 4 steps fitphone
- upcoming wednesday 12:30 11-9-2024 next meeting

client meeting notes (18-9-2024):

- 2 weeks meeting with target audience members, 5, and maybe more, 13:00 - 14:00 TU/R10
 - show demo competitor app
- first step awareness, second step ...
- brainstorming steps interesting
- diary, finding out user's activity
- learning and copying others interesting to integrate in app
- pickups > screentime
- research back-end technology/hosting
- ensure client has latest version on phone

Client meeting notes (2-10-2024):

- in two weeks, meeting at 9:00, strijp-s (16-10-2024), changed to 13:00 at R13 (room pending), changed to 11:50 at R13, 2.14
- other group researched about reducing screentime
 - research about target audience, international or dutch, their phone usage, regret phone usage, how much screentime per day
- other group uses opal to track phone usage
- other group suggest events based on user's location
- other group suggest combining (lifestyle) coaching with our app, certified coaches
- motivated stories
- keywords
- other group suggest pop-up before opening app to question why they're opening a certain app and another pop-up asking the user if they've accomplished their goal
- other group adds us to their ms teams group to share info with each other
- ideas for now no limitations, later limit the ideas

Client meeting notes (16-10-2024):

- other groups research their expertise, share their results with us and we give our feedback on the feasibility
- presentations in november and december, 9:00 - 11:00, next meeting 6-11-2024 at 9:00 - 11:00
- other group question about user security for offline interactions
- client suggests community like whatsapp, could be linked to private matchmaking, maybe encourage other apps to make chats
- other group feedback that meeting offline incentives reducing screentime
- other group asked about who/how the date and time is determined for a meeting
- other group asked about reward system, could create other social issues, mostly used to show experience with meetings
- other group asked about if it actually helps them, how do we measure it
- other group suggest to manually add progress for the user, mainly screentime/pickups
- other group suggest to restrict access to health like apps to prevent granting access to sensitive data
- client likes small discussions between our groups
- client wants a way to show for the user their progress in some way, selection for showing important things/activities, considering adding as a factor for the matchmaking
- other group suggest asking user some reflection questions per week, level determines the personalization of the questions

4-12-2024 meeting notes:

- for the graphs, show the most used apps
- give users options to visualize data
- prompt/question about the shown data once a week, open-ended questions
- stories make the app stand out compared to other apps

18-12-2024 meeting notes:

- like the interface
- likes the overlap with activities
- question about what the stories do on the home page
- question about activity if their locations are based on what you selected during the onboarding
- likes the individual concept
- 10-1-2025 fitphone exhibition
