

Checkpoint 2 Monday morning after holiday 27-02-2023

 No feedback submitted.

Veldhuijzen, Marcel M.C.J. (Teacher) 20 days ago

Progress: research and paper proto had been done. Conner is not present.

- Interview expert Pieter Wels
- Test the prototype with real users

Ivan has made progress on iOS technical stuff: scrummdinger app.

Checkpoint 1 Duo-app feedback from Marcel 15-02-2023

Georgiev, Ivan I.K. a month ago

In the first week so far we have been doing primary and secondary research to help ideate our concept. We have done survey and interview questions and by the end of the week we will be done with our design and the research documents. At the same time we are also focused on getting better at the fundamental parts of SwiftUI.

Checkpoint 5 Feedback Ruud 08-03-2023

McClanahan, Connor C.E. 11 days ago

We need to continue to get feedback from users about the ways to show beginners the right beaches for them in an easy-to-understand format. We also need to try to design a bit more of the apple style. We have started to code and are finishing up the final touches to our design we will continue to test with users to find a way to recommend different beaches for different skill levels.

Checkpoint 4 Feedback Ruud 02-03-2023

Georgiev, Ivan I.K. 17 days ago

We got told to focus more on experimenting, testing types of data we can put into the app and be more involved with the users and existing surfing communities. We did a lot of research and interviews that allowed us to create a good layout. We will continue with user testing and begin coding.

Checkpoint 3 Progress talk with Marcel 01-03-2023

 No feedback submitted.

Veldhuijzen, Marcel M.C.J. (Teacher) 18 days ago

Progress OK, please do expert interview with Pieter and ask feedback on concept from Ruud.

Checkpoint 8 Feedback from visitors of the market 16-03-2023

Georgiev, Ivan I.K. 3 days ago

Today's feedback was overall positive as the teachers and the students who tested our app really liked the idea and the simplistic design. The feedback that we mostly got which involves changes in the app was the Legend on the bottom where we have an explanation of if you can surf or not, it looked like a navbar as people tried pressing on it, we got this feedback both from the students and Ruud. The teacher whose hobby is surfing liked the design a lot as we kept it simple for beginners with an easy to understand information even if you are a beginner or a bit more advanced. The only feedback he gave us was to make it more apparent(bigger icons is what he said) where we display if you can surf or not.

Write a summary of what you discussed with your teacher...

Checkpoint 7 API Coding 13-03-2023

Georgiev, Ivan I.K. 6 days ago

We are finishing with coding, we have to finalize the details page, make a call from another api, Marcel also gave us feedback about the colors and size of the emojis.

Checkpoint 6 Ruud & Marcel 09-03-2023

Georgiev, Ivan I.K. 6 days ago

We are making progress in the design part of the project as we tested with users. To make it more beginner friendly with easy to understand information. Marcel gave us feedback about using pictures of the beaches. Ruud told us to try and implement a livestream.
