

Gorilla Testing/Research

These subjects were chosen because they are the target end group, basically, they are the main types of people who would use the product, I tested them randomly on the university campus and asked them the same questions that appeared in the survey plus some additional ones about the design that we have chosen and our of the designs given what would they choose. Below were the options and I asked what one they would prefer alongside the other stuff we asked in the earlier survey. First I asked the participants to complete our survey and read out their answers to me, then I did 5-second testing on each of the designs and asked for feedback along the way, I then wrote a summary about their feelings and what appealed to them the most. Additionally with Giada as I was using her as my target end group I had her go through our low-fidelity prototype and parts of our high-fidelity prototype and give feedback about design and usability as someone who does an urban sport.

Sam

Feedback about designs: Liked all of the designs but thought that the the third one seemed to indicate a better what was clickable and what is important information while keeping with the style of the rest of the site.

Responses:

Q: How old are you?

A: 22

Q: Where are you from?

A: Bulgaria

Q: What is your occupation?

A: Student

Q: Have you ever participated in any urban sports activities?

A: I currently skateboard

Q: What type of colors do you think of when you think of urban sports?

A: Purple, Red.

Q: Have you used an app that helps you track your progress during your training?

A: No

Q: How likely are you to use an app that helps you to track your progress during your training?

A: Very likely 5/5

Q: What do you think of the design for this page? What do you like? What do you, not like?

A: It seems to do the job but it is hard to know what to click on because there is no explanation about anything.

Q: When you see this page, what do you think it is about? (hint: it is connected with tracking your progress during your training)

A: It's impossible to tell what it is trying to tell you and the x-axis is unreadable. It needs a serious redesign.

Luka

Feedback about design: Liked the designs that were simple and said that the the fourth one is the best for usability.

Responses:

Q: How old are you?

A: 20

Q: Where are you from?

A: America

Q: What is your occupation?

A: Student

Q: Have you ever participated in any urban sports activities?

A: currently skateboards

Q: What type of colors do you think of when you think of urban sports?

A: Green, Purple

Q: Have you used an app that helps you track your progress during your training?

A: No

Q: How likely are you to use an app that helps you to track your progress during your training?

A: Very likely 5/5

Q: What do you think of the design for this page? What do you like? What do you, not like?

A: It does the job but I wouldn't know what it's for without an explanation.

Q: When you see this page, what do you think it is about? (hint: it is connected with tracking your progress during your training)

A: Nothing is labeled right and the design is confusing and unreadable.

Giada

Feedback about design: Liked the simple designs but mainly focused on the third one because it seemed to make the most sense and liked that the text was white for the header.

User Testing Feedback: Overall flow is good, likes the color scheme, and thinks it's very usable and straightforward especially compared to the previous designs that were

tested. The overall design is good just as long as we get the data design correct then it should be usable and work well.

Responses:

Q: How old are you?

A: 22

Q: Where are you from?

Italy

Q: What is your occupation?

A: Student

Q: Have you ever participated in any urban sports activities?

A: Has done parkour before.

Q: What type of colors do you think of when you think of urban sports?

A: Purple, pink

Q: Have you used an app that helps you track your progress during your training?

A: No

Q: How likely are you to use an app that helps you to track your progress during your training?

A: 5/5

Q: What do you think of the design for this page? What do you like? What do you, not like?

A: It's not usable things are off-center and it's hard to know what does what without an explanation.

Q: When you see this page, what do you think it is about? (hint: it is connected with tracking your progress during your training)

A: The graphs work but without an explanation is confusing and not possible to understand what's going on and what it's showing.

Ivan

Feedback about design: Liked all of the designs but liked the green more than the purple so anything purple was out so the fourth one was what he would have chosen.\

Q: How old are you?

A: 20

Q: Where are you from?

Bulgaria

Q: What is your occupation?

A: Student

Q: Have you ever participated in any urban sports activities?

A: Currently skateboards

Q: What type of colors do you think of when you think of urban sports?

A: green, red, purple, dark blue

Q: Have you used an app that helps you track your progress during your training?

A: No

Q: How likely are you to use an app that helps you to track your progress during your training?

A: 3/5 I want to actually be in the moment and not track stuff while skating.

Q: What do you think of the design for this page? What do you like? What do you, not like?

A: There is no explanation so I don't know how to navigate the site, but the colors look good if the picture is changed the design would actually work.

Q: When you see this page, what do you think it is about? (hint: it is connected with tracking your progress during your training)

A: I can't read the x-axis of the graph and there are no titles where there should be titles.

Denis

Feedback about design: He liked the third one because it made the most sense in usability wise it was the most intuitive and shows the important information in a different color.

Responses:

Q: How old are you?

A: 21

Q: Where are you from?

Canada

Q: What is your occupation?

A: Student

Q: Have you ever participated in any urban sports activities?

A: Currently skateboards/Surfs

Q: What type of colors do you think of when you think of urban sports?

A: green, red, blue

Q: Have you used an app that helps you track your progress during your training?

A: No

Q: How likely are you to use an app that helps you to track your progress during your training?

A: 5/5

Q: What do you think of the design for this page? What do you like? What do you, not like?

A: I don't know what does what and some of the pages just don't work it doesn't even say what the buttons do there is no explanation, but the colors work well with the site.

Q: When you see this page, what do you think it is about? (hint: it is connected with tracking your progress during your training)

A: x-axis is a mess on one graph and again there is a lack of explanation and it doesn't make sense without some titling and naming.
